Seamlessly connect your educators and staff with a cost effective solution!

The education industry has come a long way since the days of chalkboards and textbooks. With the advent of technology, schools, colleges, and universities now have access to a multitude of communication tools to facilitate student learning and improve the overall learning experience. GigTel is at the forefront of this revolution, offering innovative and cutting edge solutions designed for the education sector. Our solution provides a comprehensive and integrated approach to communication, enabling institutions to seamlessly connect teachers, administrators, and staff through one single platform.

Why replace outdated or legacy phone systems with GigTel?

Old technology is unreliable and expensive. Discontinued systems force institutions to spend a lot of money on maintenance and hardware upgrades with little increased functionality to show for it. To overcome these challenges, many schools are migrating to cloud based technology, allowing them to provide flexibility for their teachers and staff, so they can focus on a great experience for their students.

GigTel provides more flexibility and better features (at lower price points) than legacy systems can provide. The solution can be implemented quickly with little or no IT staff. Because GigTel is cloud-based, multiple sites across your school or university can connect seamlessly.

GigTel Unified Communications as a Service (UCaaS)

Designed for increased flexibility and productivity, GigTel's robust solution is built to fit your school system. With voice features that keep your educators and staff connected, your school will be able to communicate easily both on and off campus. A single, unified platform for all communication and collaboration needs, enabling educators and staff to stay connected and productive from anywhere at anytime. GigTel is a cost effective alternative to traditional communication and collaboration solutions, as it eliminates the need for expensive hardware and infrastructure investments. Our solution is incredibly user friendly, making it easy for educators and staff to use and adopt.

By using our UCaaS solution, your school system will be able to:

- Connect multiple sites and campuses across your school system.
- Optimize communication among educators, administration, and staff.
- Gain an all-inclusive solution with a predictable, "no surprise" monthly fee.
- Utilize a scalable solution to accommodate changes in student enrollment or staff size.
- Take advantage of a secure platform with 99.999% availability.
- Get everything you need and save with our solution

GigTel

Communication and Collaboration for:

The Education Market

Features you can depend on!

- **Unlimited Domestic Calling:** Make and receive calls from anywhere at anytime. You can even use extension dialing to reach campuses in different counties or states!
- **Virtual Receptionist:** Route inbound calls to the right staff or administration, allowing your front office workers to focus on important tasks. You can even give your inbound callers updates on weather delays and information on upcoming school events.
- **Top Security:** Robust and compliant so you and your faculty can rest easy. Compliant with Ray Baum's Act and Carrie's Law to ensure your safety in emergency situations.
- **Automated Notifications:** Send via text, email, or phone call in emergency situations or for weather delays and cancellations.
- **Location Masking:** Our solution allows your DID number to change, meaning you can protect the location of your classroom.
- **Service & Support:** Free on-boarding and unlimited, 24/7 support conducted by our US-based staff.

Unified Communications is changing the way schools communicate and it's time for you to take advantage of these incredible benefits. Contact us to learn how you can improve communication and collaboration within your school system, focus on a complete learning experience for your students, and save by switching to GigTel's UCaaS solution!

Easy to use. Easy to manage.
